Description

The NEW ATOM SAVANT is here!
The SAVANT is a blend of Atom's famous derby Boom and Juke urethane on an oversized core with a molded lip. The oversized core not only reduces weight but increases the overall roll (speed). With the increased speed the molded lip plays a big role in ensuring the grip characteristics remain. The proven original performance derby wheel! (others followed like Radar HALO!) The Savant employs a lower profile tire, with oversized hub, providing higher roll than the durometer expected response! Sold in 8-packs.

ATOM SAVANT Features:
• Oversized 45mm Core
• 5mm tire with 7mm lip
• 68 grams per wheel (Over 20% weight reduction compared to Boom Solid Core 59x38)

Size: 59mm x 38mm
Hardnesses: 88A, 91A, 93A, 95A, 87A, 99A
Surfaces: Plastic, Wood, Slick Sport Court

Reviews

Thursday, 12 January 2023

> The 91As are a perfect blend of grip and speed on a slick floor. The size and light weight make for easier, faster footwork and smoother transitions.
