Description

The ***Roll-Line*** **SPEED RACE Professional Bearings** are specifically designed and manufactured for very High Level Competitive Roller Skating of all types.

The ***Roll-Line*** **SPEED RACE Professional Bearings** are Free Rolling with minimal Radial Play which promotes and very evenly distributes the load across the 7 balls for optimal Roll and a good amount of Axial Play or Thrust, which is the side movement of the inner race in relation to the outer race. This movement is very important because when Skaters push, we always put side load on the skate to get power in the push or stroke. If the Bearing does not allow for this, it will bind and LOOSE operating speed or ROLL. These provisions in the Race Curvature and Contact Angle allow the ***Roll-Line*** **SPEED RACE Professional Bearings** to ROLL very freely.

The ***Roll-Line*** **SPEED RACE Professional Bearings** have a single rubber Shield to help keep the dust and dirt out. The high performance Ball Crown Cage is Carbon impregnated to provide a little extra dry lubrication to ensure these Bearings will perform far beyond most other Bearings. ***Roll-Line*** **SPEED RACE Professional Bearings** are available for skates with 8mm OR 7mm Axles. These ultra high performance ***Roll-Line*** **SPEED RACE Professional Bearings** will perform at the level of some of the most expensive ceramic bearings, but have the resiliency and strength to provide better performance for much less cost. The ***Roll-Line*** **SPEED RACE Professional Bearings** are skated on by most of the World level Skaters and Champions in Artistic and Quad Ball Hockey.

No matter what type or your level of Skating, GREAT Bearings can only help!
