Description

The Limited Edition BONT FXX Wheel, in 92A (derby profile) or 96A (speed profile) both take standard 8mm bearings!
This is a limited edition run of the highly acclaimed Bont FXX roller skate wheels. These wheels are an improved version of the original FXX roller skate wheels, with enhanced features for optimal performance.

"The Bont FXX roller derby (59mm) and speed skating (63mm) roller skate wheels are lightweight performance wheels that feature high-quality urethane and an aluminum hub for the ultimate combination of grip and roll. Made with the best urethane in USA, the FXX uses a technical 5-spoke hub for lightweight, premium performance. The aluminum hub allows for unparalleled stiffness and control, which translates to brilliant edging and maximum agility.

The FXX comes in 2 hardnesses 92A and 96A, with amazing rebound and wear properties. They are super fast and phenomenally grippy while still allowing you to skid to a stop instantly. The 59x38mm size lets you change speeds quicker, making them the perfect choice for derby skating. The 62x44mm size gives you a larger surface for longer pushes for maximum power, making them the best choice for speed skating.

Drawing on our inline speed skating wheel that has won multiple inline world championships, we used one of our top inline speed wheel formulas on the FXX and adapted it for roller skating. This is unheard of in a roller skate wheel. No one uses the best inline racing formulas in roller skate wheels. When we spoke to wheel makers about using a top inline formula in a roller skate wheel this is what they said: 'It will cost too much, roller skaters don't want to pay over $250 for a set of wheels no matter how good they are'. 'Roller skaters can't tell the difference between a high-end or low-end urethane'. And 'our standard high-end roller skate urethane is good enough'. We said 'screw that' and started testing wheels using more exotic urethanes previously only reserved for inline racers. The result, in our opinion, is the best mass-produced roller skate wheel ever made. We are sure you will appreciate the effort that we put in to bring this wheel to market."

Available in:

Derby 59 x 38mm - White 92A
Derby 59 x 38mm - Blue 92A
Derby 59 x 38mm - Red 92A

Speed 63 x 44mm - White 96A
Speed 63 x 44mm - Pink 96A
Speed 63 x 44mm - Blue 96A
Speed 63 x 44mm - Red 96A

Sold as a set of 8

NOTE: *The FXX Limited Edition Wheels use standard 8mm 608 bearings, not the mini 688 bearings used in other versions of FXX wheels.*
