Description

The **Bont 688 (8mm) and 167 (7mm) mini bearing** has an exceptionally fine polished bearing track surface and incredibly precise balls. The light weight plastic cages allow for lower rolling resistance. The steel, which is extremely strong, helps the bearing keep its shape when under load.

The optional adapters fit over your 688 or 167 mini bearings so that they can fit into regular non-FX1 wheels. These bearing adapters allow you to use a mini bearing in a wheel that was made for a larger 608 bearing. The benefit of using a mini bearing and an adapter rather than a 608 bearing is that you can create a much lighter set up with better acceleration. This product requires cylinder spacers, not the normal self centering spacers.

Bearing Type: 688 mini
Dimension: 8x16x5
Protection: ZZ
Cage: SPCC 08F
Quality: Bearing steel GCr15
Ball complement: 9 pieces
Ball Material: Steel

Pack of 16 pieces.
