Description

CRAZY Flash Light-Up Skate!!
The CRAZY Flash is a high-top sneaker style skate that features multiple LED lights, quality components, and has been designed for comfort. These are a great all-around skates for the young one in your life!
Kids and Juniors will love the CRAZY FLASH quad skate with the built-in LIGHT-UP Flashing Feature! The motion-activated flashing LED lights can be switched off when not in use for preserving battery life. Built Aussie-tough, the CRAZY Flash skate uses a reverse kingpin to make adjustments simple. Comes complete with a light and durable Nylon plate, non-marking rubber toestops and 60x37mm real urethane wheels (not cheap plastic) suitable for both indoor and outdoor skating, installed with ABEC-1 8mm full precision bearings.

Super Bright LED's
The CRAZY Flash has multiple LEDs in each skate. First, the sole of the shoe is surrounded with bright, flashing LEDs that light up as the skate rolls along. Next, each skate has a flashing heart on its sideBoth sets of LEDs are motion activated and powered by easily accessible and replaceable batteries.

Quality Build
Any roller skate is defined by the quality of its “roll”. This is the feeling experienced when using the skates and is key to instilling a love for roller-skating in young skaters. All too often parents will buy cheap plastic skates for their child with wheels that barely turn or move, which can quickly kill any interest in the sport. This is why we’ve focused on putting the best components into the Flash line of products to ensure a quality and fun experience that will having your kids loving skating for years to come! We start off our design by using solid urethane wheels and toe stops. These allow the skates to be used in either outdoor or indoor settings and give a good amount of “grip” on any surface. We also use ABEC full precision bearings, which allow the wheels to smoothly roll, accelerate, and decelerate. The turning radius on the skates can also be adjusted by loosening or tightening a screw, which allows you to increase or decrease the turning angle to match your child’s ability. All of these things, taken together, constitute a great roller skate that will have your childgrinning as they roll smoothly along.

Comfort Design
It also doesn’t matter how smooth a skate rolls if its not comfortable to wear. This is why we take special care in designing the skate shoe to fit properly, to breathe and to provide adequate support, all of which will allow it to be worn for long periods with no discomfort. However, you have to be careful to not overstuff with padding, as that makes the roller skates less responsive and clunky. So, we’ve added just the right amount of padding to the tongue and collar, along with covering the inside with our signature comfort lining, to ensure that the Flash can be worn comfortably for long periods and let you skate to your heart’s content.

• • • LAST PAIR AVAILABLE!! Size Mens 3.5/Womens 4 EU 35

SIZING TIP: *Check the FLASH skate Insole Length measurement below, and compare with your insole from a snug fitting running or athletic shoe. Your foot length should be a little smaller than the insole length by about 5-8mm. (For growing kids feet, recreational skating, you could allow more room.)*
