Description

TSG FORCE V A Kneepads! The Force V A knee pad is probably the BEST kneepad available on the market! A low-profile, hard cap vert pad but offers the enhanced protection and comfort of an extra layer of Arti-Lage Foam. Hence the 'A' for Arti-Lage after the 'V' model name! This special flexible and soft Arti-lage foam actually hardens on impact and offers the toughest, hardshell protection available! Another super unique feature thats sete the Force V A apart from every other kneepad on the market is the anti-shift silicone swirls printed on the inside liner! That, along with two adjustable Neoprene butterfly straps provide unmatched pro-level custom fit and security! The extra layer of foam give the pad added form-fitting comfort and protection from bails! This is THE Superior MOVE-UP Kneepad for Derby! Comes as a set of 2 Kneepads.

ALL PREMIUM FEATURES:

COMPLETE IMPACT PROTECTION:
Special ACF (Arti-lage) impact foam is normally flexible and soft, but when faced with impact, it offers the toughest, hardshell protection. High-density, replaceable PE knee cap offers the utmost toughness and security from impact forces on rough and concrete grounds. Multilayers of ultra-soft EVA foam shields your knees from the shocks and vibrations. Skaters have the extra protection from a compression-molded foam pad with a raised top around the joint area.

DURABLE CONSTRUCTION:
Durable and sturdy pads made of hard shells offer complete protection from cuts, scrapes, and strain-related pain. Hardshell construction offers ultimate protection from friction-related injuries during a fall or from impacts caused by different objects on concrete or wooden ramps or from falls from a great height. Knee pads use heavy-duty tear-resistant nylon to withstand the rigors of the game. EVA foam offers stress-crack resistance and low-temperature toughness.

PRE-SHAPED, HORSESHOE DESIGN:
Force V A pad's pre-shaped design conforms to natural body shape and secures well for a comfortable, close fit. Unique horseshoe shape provides ample coverage over the knees. The horseshoe shape keeps the pad in place, without shifting and sliding during swift motions of the game. Ergonomic low-profile design does not interfere much with skating styles, especially crossovers. Force V A offers unique enlarged area coverage for added protection.

COMFORTABLE TO WEAR:
360° velcro straps offer a tight, yet comfortable fit. Skaters will love the easy on-off capability offered by the versatile open-back design with neoprene butterfly velcro closure. Players can easily put on and take off the pads without removing their shoes. Adjustable bottom velcro straps have concealed easy-snap buckles. The knee pad is reinforced at critical stress points for added protection. The inner surface has a comfortable lining fabric for pleasurable wear.

CERTIFIED FOR SAFETY STANDARDS:
TSG gets it that athletes and professionals do not want any compromise when it comes to safety. TSG safety pads are made with the utmost quality and performance standards to meet the EN 14120:2003+A1:2007 Level 2 standard for the wrist, palm, knee, and elbow protectors. Designed in Switzerland, TSG knee sleeves are tested by an internal team of riders and certified by independent lab testing.

> The Force V A knee pads have a good grip on the knee thanks to the silicone print and are well padded so that most of the impact is kept away from the knee. Only the stitching feels a bit stiff at the beginning. You have to wear the pads for a while before you find them comfortable. They will protect you from those really hard bails (indoor or concrete), even if your 90+ kg. Anyone who has done a lot of park skating, will know how important it is to have proper protection and these are of excellent quality.
