Description

The ICE Wheels by Roll-Line have been designed exclusively for the discipline of Dance- Style, Free, or Couples. The ICE Wheels can also be used for group disciplines- Quartet, Precision or Show Group. The grooved profile of the ICE Wheels is the distinctive design that provides very smooth and agile wheels that are silent and give excellent grip when necessary. The rounded profile means the ICE Wheels have a minimal adjustment time for the skater.

Hardness: Blue 88A, Gold 90A, Green 92A, White 95A, Silver 97A
Diameter: 61mm
Compound: Polyurethane tread
Hub Info: Thermoplastic Elastomer – Chromed
Printing: The ICE Wheels have the name and wheel information printed on the back surface of the wheels, providing a clean look

The Hubs of the **ICE** Dance Wheels are Chromed. The back side of the Wheel (where the printing is) and the color of the hub identifies which hardness the wheel is.
88A = Blue
90A = Gold
92A = Green
95A = Silver/White *(Like North American 101A)*
97A = Silver/Grey *(Like North American 103A)*

NOTE: In North America, the most popular ICE Wheels used by most Dance Skaters are the ICE 95A ***(which is similar to others 101A in grip, but with more ROLL)***, while the ICE 88A, 90A, and 92A are used for the ability to press those Strong Edges on Skating Surfaces that are a bit less than tight. The ICE 97A ***(which is similar to others 103A in grip, but with more ROLL)***, is best used on high level competitive Skating Surfaces that are a bit more Tight to provide that incredible ROLL.

• • Order your bearings at the same time as the wheels, and request FREE professional bearing installation!
