Description

INTRODUCING The VNLA Backspin ASTRO Wheel! One of the lightest roller skate wheels on the market! The Backspin Astro features a high strength aircraft aluminum CNC hub, that is guaranteed not to crack or flex. In addition to the high spec aluminum hub, Backspin is using their all new high-grip 96-98A urethane. These wheels run harder than their durometer since they have a very low profile tire on an awesome looking oversized hub! The Astro comes in two sizes, 58x38mm and 65x43mm. The Mini 58mm wheel is ideal for jam skaters and derby players looking for lower center of gravity and quicker transitions. The Taller 64mm wheels are perfect for speed and shuffle skaters, where top speed is desired. Keeping with Vanilla's jam skating heritage, the look is as important as the function, that's why every set of Astro wheels includes a

matching set of jam plugs and a beautfully made reusable wheel box! Sold complete as 8-Packs.
